

# NEW U. OF MISSOURI TYPE

---

Norman Touchette (#1035) of St. Louis has submitted for the editor's inspection a cover bearing a new Perfin type from the University of Missouri, as illustrated at left. The illustration is not the actual Perfin, but a hand drawing to show its general character.

Norman also submitted a copy of a letter he has written to the University, seeking details concerning the new Perfin device. As soon as further information is developed, it will be published in the Bulletin.
